RESEARCH
EXPERIENCE

Prof. Nezih Guner, Spain
Research Assistant, January 2022 - June 2022

The Economic Journal, Royal Economic Society, United Kingdom
Research Assistant, January 2020 - January 2022

Center for the Study of Organizations and Decisions in Economics (CODE), UAB, Spain
Research Assistant, September 2019 - December 2021

National Council of Applied Economic Research, India
Research Analyst, December 2016 - June 2017
Research Associate, December 2015 - December 2016

Research Assistant for Dr. Shesadri Banerjee, India
Research Assistant, December 2015 - February 2017

TEACHING
EXPERIENCE

Universitat Autònoma de Barcelona, Spain
Teaching Assistant, Macroeconomics II (PhD)
IDEA Graduate Programme
Instructor: Francesc Obiols, Winter 2020-21
Instructor: Nezih Guner, Winter 2021-22
Instructor: Alexander Ludwig, Winter 2022-23 (*Scheduled*)

Barcelona School of Economics, Spain
Teaching Assistant, Foundations in Equilibrium Analysis
MSc Macroeconomic Policy and Financial Markets, Autumn 2021-22
Instructors: Esther Hauk & Hugo Rodriguez

Barcelona School of Economics, Spain
Teaching Assistant, Macroeconomics
MSc Macroeconomic Policy and Financial Markets, Autumn 2021-22
Instructors: Francesc Obiols & Juan Manuel Figueres

ABSTRACTS

Targeting Inflation Expectations? || Job Market Paper

Abstract: Do inflation expectations respond to changes in monetary policy? Subjective expectations and an event study methodology are used to find that countries with a single mandate have a reduction in short run forecast errors. However, the adjustment in forecast errors does not come from an adjustment in inflation expectations but an adjustment in inflation. Thus, the key insight of the paper is that inflation targeting does not have a direct impact on short-run inflation expectations but an indirect effect through inflation as a result of learning by the agents. Thus, providing evidence contrary to the standard belief that inflation expectations lead inflation. Finally, the paper also performs a quantitative exercise which finds that the weight that agents attach to the inflation target is small relative to the rational expectation benchmark.

(Dis)Inflation Targeting with Luis E. Rojas

Abstract: Extending the model proposed by Barro and Gordon (1983) by introducing an independent central bank, subjective expectations, and announced intermediate inflation targets this paper aims to explain the disinflation process adopted by the Latin American economies. Specifically, given the introduction of a new independent central bank we ask if the policy of the announced intermediate targets were cheap talk or the targets aided the disinflation process. We hypothesise that announcing intermediate targets reduced the cost of disinflation by reducing the inflation surprises the agents face and enabling agents to learn faster. The reduced surprises also help in developing credibility for the central bank further building the basis for faster learning. Finally, we also show that the cost of disinflation reduces when there are announced inflation targets.

Networked Inflation Expectations: A Closer Look at Professional Forecasters with Gabriela Stockler (Work in Progress)

Abstract: Disagreement among professional forecasters is a well documented feature of inflation expectations. We hypothesise that this disagreement is the result of a network and strategic sharing between forecasters. A preliminary theoretical model with information sharing among agents and rational expectations suggests that full information access leads to forecasts which are close to realised inflation. We now aim to use data on professional forecasters to uncover the type of network.
